#### **DETAILED ACTION**

### Response to Amendment

Claims 1, 3-5, 9-10 and 12 are pending in the application prosecution. The applicant has canceled claims 2, 6-8 and 11. Claims 13-23 are canceled in this office action.

#### Election/Restrictions

This application is in condition for allowance except for the presence of claims 13-23, which are non-elected without traverse. Accordingly, claims 13-23 been cancelled.

#### Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 13-23.

# Claim Rejections - 35 USC § 102

The rejection of claims 1-6 and 8-10 under 35 U.S.C. 102(b) as being anticipated by Kitano (JP 2000-149,950) has been overcome by the applicant's amendment.

MP

### Allowable Subject Matter

Claims 1, 3-5, 9 and 12 are allowed. The following is an examiner's statement of reasons for allowance.

The instant claims are to a composition comprising a core with the formula,

$$\text{Li}_x\text{M'}_z\text{Ni}_{1-y}\text{M''}_y\text{O}_2$$

including molar ratios as claimed, wherein M' includes magnesium, M" includes cobalt and boron and a coating on the core having a greater ratio of Co:Ni than the core. The prior art does not teach a composition Li<sub>x</sub>M'<sub>z</sub>Ni<sub>1-y</sub>M"<sub>y</sub>O<sub>2</sub>, wherein M' includes magnesium, M" includes cobalt and boron and a coating on the core having a greater ratio of Co:Ni than the core. Further, the prior art does not teach the composition Li<sub>x</sub>Mg<sub>z</sub>Ni<sub>1-y</sub>Co<sub>y</sub>Q<sub>v</sub>O<sub>2</sub> and a coating on the core having a greater ratio of Co:Ni than the core. The prior art does not teach core compositions of these formulae with a coating on the core having a greater ratio of Co:Ni than the core.

The most pertinent prior art includes Kitano (JP 2000-149,950), which teaches a composition comprising a core with the formula,  $\text{Li}_x\text{M'}_z\text{Ni}_{1-y}\text{M''}_y\text{O}_2$  ( $0 \le y \le 0.25$ ,  $0 \le z \le 0.15$ ) with M being a metal excluding Ni and Co. The term about is noted for the various values of each variable in the dependent claims. Examples of metals used for the variable M include Mg and Mn (paragraph 10.) The material has a magnesium-cobalt-lithium coating on the core inherently having a greater ratio of Co:Ni than the core as no Ni is in the coating. The reference does not teach a composition  $\text{Li}_x\text{M'}_z\text{Ni}_{1-y}\text{M''}_y\text{O}_2$ , wherein M' includes magnesium, M'' includes cobalt and boron and a coating on the core having a greater ratio of Co:Ni than the core or a composition  $\text{Li}_x\text{Mg}_z\text{Ni}_{1-y}\text{Co}_y\text{Q}_v\text{O}_2$  and a coating on the core having a greater ratio of Co:Ni than

Art Unit: 1745

the core. In addition, JP 11-040,153 teaches a composition comprising a core with the formula, Li<sub>x</sub>B<sub>v</sub>Ni<sub>x</sub>Co<sub>y</sub>CaO<sub>2</sub> with the molar rations in the claimed ranges. The material does not include coating on the core having a greater ratio of Co:Ni. JP 10-208,743 teaches a positive electrode active material of the formula Li<sub>w</sub>Mg<sub>v</sub>Ni<sub>x</sub>Co<sub>y</sub>B<sub>z</sub>O<sub>2</sub>. The material does not include coating on the core having a greater ratio of Co:Ni. The prior art references do not teach core compositions of these formulae with a coating on the core having a greater ratio of Co:Ni than the core.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

# Examiner Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Ruthkosky whose telephone number is 571-272-1291. The examiner can normally be reached on FLEX schedule (generally, Monday-Thursday from 9:00-6:30.) If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached at 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
